You've probably already done this, but Allison also separated out comments.

Subject: Public Comments Sorted by Category

All--

I know I said I'd do this a few weeks ago but with all of the flurry of activity around the May 15th deadline, sorting all the comments by category got pushed to the back burner. With many thanks to a colleague here that was able to lend a hand with a lot of the sorting please see attached.

We created a separate worksheet for each category to house all the comments coded to that category so it will be easier for us to target all the relevant comments on each topic as we discuss each issue. Due to the file sizes, we broke up the comments into 3 different documents: Agriculture, Hydromod & Wetlands; Forestry; General, New Devel & OSDS. Worksheet tabs for each category only contain the comment code #. You'll have to go back and reference the complete entry on the Master spreadsheet (the 1st wksheet in each file) to obtain all the info related to that comment.

I'm going to start roll up some of the specific general comments into broader, overarching comments we can respond to. Will send them around to the group to see what you think and make sure I'm on the right track.

Allison
